

ADITYA KRISHNAMACHAR

(203)-246-5003 | akrishnamachar@wustl.edu | [LinkedIn](#) | [GitHub](#)

EDUCATION

Washington University in St. Louis

MS in Computer Science

Dec 2021

GPA: 4.0 / 4.0

BS in Computer Science
and Financial Engineering

May 2021

GPA: 3.5 / 4.0

LEADERSHIP

Association for Computing Machinery at WashU (ACM)

Programming competitions, lead
weekly meetings | 01.2018 – present

WashU Trading Club

Weekly meetings, participate in
trading comps | 09.2018 – present

Contra - Men's Ultimate Frisbee

Player, Head tournament director at
Huck Finn 2019 | 09.2017 – present

Gateway to the Great Outdoors

Mentor 5th graders + lead overnight
camping trips | 01.2019 – 01.2021

SKILLS

Java • Python • C • MATLAB • SQL
React • NodeJS • Unity • Hadoop

COURSEWORK

Web Development

Optimization

Parallel & Concurrent Programming

Algorithms

Reverse Engg & Malware Analysis

Data Science

hobbies!

hiking, xc + downhill skiing, biking,
(very!) competitive ultimate frisbee.
Liverpool FC aficionado.

EXPERIENCE

THE BOEING COMPANY

Machine Learning Intern | Summer 2020

- Improved prediction of airplane component timelines by 20% + identified significant variables that drive production schedules; worked with customers in WA, SC, MO; presented work to upper management
- Consulted on NER word-embedding project; part of versatile AI-ML team

FORD MOTOR COMPANY

Research and Development Intern | Summer 2019

- Wrote software to automate data retrieval + use; eliminated manual steps in highly used neural network pipeline; improved Driver Assistance Technology (DAT) features within the Autonomous Driving framework
- Work presented at Ford Global Control Conference (Dec. 2019)
- Used Hadoop as backend; MATLAB for GUI; Unreal Engine for simulation

WASHU ENGINEERING

Teaching Assistant, Web Development + Intro to CS | 08.2018 – present

- Helped students build skills in object-oriented programming, user-centered design; handled API calls, built websites; used JS, React, Node.js

JD CAPITAL

Analyst | Summer 2018

- Built volatility surfaces and probability distributions using Bloomberg data
- Analyzed arbitrage opportunities focusing on ETFs; modeled in Python

EPISTEME CAPITAL

Analyst | Summer 2018

- Created short-term forecasting models to predict changes in commodities
- Focused on corn, natural gas, soybeans – used Bloomberg, VBA, Python

PROJECTS

FORD COMPANY HACKATHON | FIRST PLACE, 2019

- Worked with team of four software + hardware engineers to create Proof-of-Concept low-cost road quality mapping system
- Used internal + external car cameras, Hadoop backend, Raspberry Pis, MobileNet CNN to build model to evaluate condition of roads
- Placed 1st in Hackathon; presented work to Ford Global Leadership

DATA VISUALIZATION WITH 538 | Personal Project, 2020-21

- Used FiveThirtyEight data and React frontend to create an interactive model of a Premier League football season

ASTRONOMY RESEARCH | Independent Project, 2017

- Completed photometry analyses; discovered 5 asteroids (!)
- Published lightcurve research in MPB (43-3, 2016)
